

**It's time to
dispose of
your unused
opioids.**

**Take action to keep
yourself, your family
and [community name]
safe.**

**Let's rid our community of
added risks for addiction.**

Properly dispose of unused opioids pain medications such as hydrocodone, oxycodone, morphine, fentanyl and codeine.

The use of opioid medications without a prescription can have devastating impacts on individuals and communities. Take action to prevent your unused medication from contributing to legal consequences and overdose deaths in Alaska. Dispose of your prescription properly at any of these locations:

✘ Never flush your prescription. Never throw it in the garbage unless you've been given a medication disposal bag designed to destroy opioids at home.

✘ Never share your prescriptions with family, friends or anyone at all.
