

Protect Medicaid!

Give us a Real Chance to Reform Care and Cost

We Keep Getting Cut

Rate Freezes: Medicaid rates have been adjusted for inflation only once since 2015

Rate Cuts: Medicaid rates were cut 5% in SFY2018 and SFY2020

Unsustainable: Medicaid is paying some hospitals/nursing homes 6.7-8.1% below cost

Access to Care is in Jeopardy

Vulnerable Long-Term Care: We have the fewest nursing home beds in the country

Strained Hospitals: Only 8 other States have fewer hospital beds per 1,000 residents

Behavioral Health Crisis: We are severely underserved for behavioral health services

Medicaid Is Performing

Per Capita Spend: Medicaid general fund spend per enrollee dropped 38% since 2013

Cumulative Spend: Total Medicaid general fund spend is less today than 4 years ago

Smart Investment: Expansion population only accounts for 3% of State Medicaid spend

Meaningful Health Care Reform

Economic Engine: Hospitals and nursing homes contribute \$4.5 billion to our economy

Workforce Supply: Streamlining licensure requirements can relieve caregiver shortages

Payment Reform: We are ready to work with the State to move from volume to value
